Ensure that students have the appropriate resources to refer to while answering the questions, such as color charts or crayons.

TestGenie Answer Key

Class: 3

Subject: English

Answer Key for Class 3 English - Topic: Colour

Descriptive Questions:

1. Describe your favorite color and explain why you like it.

Answer should include personal response. For example, if the student's favorite color is blue, they might explain that it reminds them of the ocean or the sky and makes them feel calm and happy.

2. How do colors make you feel? Give examples of colors and the feelings they represent.

Possible answer: Colors evoke various emotions; for instance, red can signify anger or love, blue can feel calming, yellow can bring happiness, and green can represent nature or tranquility.

3. Explain the importance of sharing colors (or crayons) with friends using an example from your life.

Sample answer: In my art class, I did not have a blue crayon, but my friend had an extra one and let me use it. By sharing, we could complete our drawings together, making it more fun and colorful.

4. What are the primary colors? Explain how they can be mixed to create other colors.

The primary colors are red, blue, and yellow. When mixed, blue and yellow create green, red and yellow create orange, and red and blue create purple.

5. Write a short story using at least three different colors as characters. Describe their personality traits.

For example: Once upon a time, Red was bold and adventurous, Blue was calm and wise, and Yellow was cheerful and bright. Together, they went on a journey to create the most beautiful coloring book.

6. List some fruits and vegetables that represent the colors red, yellow, and green. Explain why you chose them.

Sample answer: Red 🍎 Apples, because they're often bright red in color. Yellow 🍌 Bananas, which are recognized for their vibrant yellow peel. Green 🥦 Broccoli, as it is commonly green and healthy.*

The answer key is generated by testgenie.ai and should be reviewed for precision.

Multiple Choice Questions (MCQs):

1. Which of the following is a primary color?

Correct Answer: c) Yellow

2. What color do you get when you mix red and white?

Correct Answer: a) Pink

Word Meaning:

1. What does "crayon" mean?

A crayon is a colored stick of wax used for drawing or coloring.

2. Define the term "primary color."

Primary colors are the basic colors that cannot be created by mixing other colors; they are red, blue, and yellow.

3. What is meant by the word "mix"?

To mix means to combine different colors together to create new colors.

4. Explain the meaning of "shade."

A shade is a variation of a color, usually made darker by adding black.

5. What does "bright" refer to when speaking of colors?

Bright refers to colors that are vivid, lively, and easily visible, often with a lot of light.

6. What is a "rainbow"?

A rainbow is a meteorological phenomenon that occurs when sunlight is refracted, reflected, and dispersed in water droplets, creating a spectrum of colors in the sky.

The answer key is generated by testgenie.ai and should be reviewed for precision.

This answer key provides comprehensive responses that help students understand the topic of colors while allowing for personal expression in descriptive answers.
